Julius B. Eghan

Front End Developer

I am a web developer with 2.6+ years of experience developing responsive and reliable web apps.

I would bring a service-focused and hard-working attitude to this role. With my training and experience in the fields of web design and mobile design, along with my ability to develop UI and UX designs and program with React Js, React Native, Typescript, and Next Js.

I am familiar with systems like Webflow, Git, React Native Expo, Figma and Sketch, Tailwind CSS, and working with APIs which most of these skills were self-taught, and to the maximum perfection, I believe I can do the work most graduates cannot do professionally and bring more to the table in terms of my adaptability and innovation-driven mindset with discipline.

If you have any further questions, please do not hesitate to contact me. Thank you for your time and consideration. I look forward to hearing from you.

Warm regards,
Julius Eghan
